

# Korea Less Traveled

## ... The Challenge Awaits

### OVERVIEW

The *Korea Less Traveled* (KLT) program pairs US military personnel with Korean university students to provide a special opportunity to explore South Korea in areas ranging from traditional Korean culture and the natural environment, to modern Korean society and contemporary lifestyle.

The KLT pairs (M+M or F+F) are assigned based on their application information; and over a period of six weeks (including 6 weekends) each KLT pair completes a number of challenges of varying degrees of difficulty that will have them exploring Korean society and culture in the city of Daegu and beyond.

### CHALLENGE CATEGORIES

The KLT challenges are arranged into five categories:

- **KNU (Campus) Challenges** designed to introduce American participants to KNU (and to test the Korean students' knowledge of their own university);
- **Korean Movie Challenges**, designed to introduce aspects of Korean history, culture, and society to American participants through the medium of film;
- **Daegu City Challenges**, designed to get participants to explore the colorful city of Daegu;
- **US Military Challenges**, which give Korean participants a chance to learn more about the work and lifestyles of their American military partners; and finally,
- **Korean National Challenges**, many of which encourage participants to take their KLT experience to the next level, but for the most points.

### CHALLENGE POINTS

Each completed challenge is awarded points according to the degree of difficulty associated with it. To ensure participants enjoy a full range of KLT experiences, their scores must contain a minimum number of points from each category. Teams are awarded a Standard Completion Certificate; a "Silver Category" certificate; or a "Gold Category" certificate depending on how many points they earn.

### TO JOIN THE PROGRAM:

Send an email to [korealesstraveled@gmail.com](mailto:korealesstraveled@gmail.com). You will receive instructions on how to apply within 24 hours
